

Ruby-Blue Bunny™

Protecting your baby's
health and development
through clean skin care

CONGRATULATIONS ON YOUR NEW BABY FROM RUBY-BLUE BUNNY™

We know that you want your baby to be happy and grow up healthy and strong. Learning is the best way to do this and because we realize knowing what you need to do to have a healthy baby is much easier said than done, we have created this baby skin care guide.

There are many healthy-choice resources to help new mothers decide how best to breastfeed baby, what diapers to use, or when to schedule nap time. This is all important information to know when caring for your baby, however there is one more health choice to make which effects your baby's growth and development over his or her lifetime and that is knowing the answer to what skin care products will you choose?

Baby's skin must be healthy and soft with no dry or irritated skin areas. Skin care products are used for cleaning baby's body and protecting the skin from too much moisture, dirt or dry air which can make the skin unhealthy. These products include, shampoo, conditioner, lotion, oil and creams. Too often many of these products created and marketed to help baby, in fact can harm the skin, body and the environment because of the amount of unnatural chemical ingredients used.

Ruby-Blue Bunny is an expert in endocrine disruptors and harsh chemicals used in skin care and have created this booklet to educate you on the reasons why choosing safe, clean ingredient skin care is very important not only to your baby, but for the whole family.

CLEAN SKIN CARE MATTERS

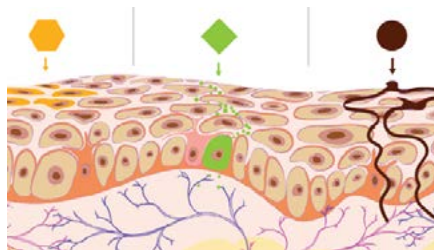

The average child is exposed through skin care products to 27 chemicals a day that have not been found safe for children¹

Many of us forget that our skin breathes. Much like our lungs that inhale and exhale air, our skin absorbs both the air and moisture. Our skin exhales through tiny holes that produces sweat. This means that the ingredients we put on our skin matters.

Ingredients in skin care can be man-made chemicals or made from natural plants, minerals or salts. The skin absorbs these ingredients and many reach the many small blood vessels just under skin. Once in the blood these ingredients get sent throughout the body where they can do harm, or good.

NUTRIENTS OR CHEMICALS GET ABSORBED BY THE SKIN

1. Children Exposed Daily to Personal Care Products With Chemicals Not Found Safe For Kids. EWG. 2007 (<http://www.ewg.org/news/news-releases/2007/11/01/children-exposed-daily-personal-care-products-chemicals-not-found-safe#.WbrR5K3Mwkg>)

BABY'S NEED MORE PROTECTION

Did you know...

A baby skin is 30 percent thinner than an adult's, and can absorb greater amounts of chemicals from the skin surface.

Studies found skin absorption rate for chemicals is 100% for underarms and genitalia (Kasting and Kretsos. *Skin Pharmacol Physiol* 2005;18:55-74).

The blood-brain barrier that helps block harmful chemicals from reaching brain tissue is not fully formed until a baby is six months old.

HARMFUL CHEMICALS USED IN SKIN CARE CAN BE:

Hormone Disruptors/Endocrine Disruptors

- effect reproductive system, brain and growth -

Carcinogenic

- cause cancer -

Irritants / Allergenic

- cause skin redness and irritation, trigger asthma -

THE RESEARCH

82% of children are exposed every week to one or more ingredients with the potential to harm the brain and nervous system.

69% of children are exposed every week to one or more ingredients that may disrupt the hormone system (endocrine disruptors), and 3.6% of children are exposed to ingredients with strong data linking them to cancer, including chemicals classified as known or probable human carcinogens (cancer-causing).

80% of children's products marked as gentle and non-irritating contain ingredients linked to allergies and skin or eye irritation according to government and industry sources.

BABY'S SHOULD AVOID HORMONE DISRUPTORS

World Health Organization (WHO) and the United Nations Environment Programme (UNEP) have classified certain chemicals ingredients as hormone disruptors/endocrine disruptors (EDCs). These EDC chemicals commonly found in skin care products mimic the body's natural hormones. These fake hormones can make the body think it has too much of one hormone, or not enough of another hormone causing an unhealthy imbalance. The WHO research has shown that hormone disrupting chemicals are associated with:

- **altered reproductive function in males and females**
- **increased incidence hormone-related cancers such as breast cancer¹**
- **abnormal growth patterns and brain developmental delays in children¹**
- **changes in immune function, including allergies/asthma¹**

AREN'T ALL PRODUCTS TESTED FOR SAFETY?

NO

1 of 8 of the 82,000 ingredients
used in cosmetic and personal care
products are hazardous industrial
chemicals.

There is no government safety
check on these chemicals used in
skin care anywhere in the world.
Even the US Food and Drug
Administration doesn't require
studies or testing to determine a
product's safety before a cosmetic
product is put on the shelves of
a pharmacy or grocery store.

Skin care manufacturers are also
free to use any claim they wish,
such as "safe" and "ultra mild,"
without lab testing proof.

THAT IS WHY WE DO SKIN CARE DIFFERENTLY

Ruby-Blue Bunny™

We care about the ingredients we put on our skin, especially our children's skin. That is why we have created the only proven safe natural skin care brand.

We use an independent lab to test all of our products for harsh chemicals, allergens, heavy metals, and hormone disruptors - **WE ARE VERIFIED AND CERTIFIED!**

We are the only brand to use up to 18 synergistic organic botanicals to clean, protect, nourish, moisturize and soothe delicate infant skin.

ENDOCRINE DISRUPTOR-FREE
INDEPENDENT
NSF-APPROVED LAB

INGREDIENTS
HARMFUL CHEMICAL-FREE

OUR CERTIFIED LABORATORY TESTING

We know through environmental research that synthetic (man-made) chemical ingredients and some natural ingredients commonly found in skin care products are toxic, irritative or can disrupt hormones.

We are proud to be the only brand to work with an independent lab, approved by the US EPA, FDA and worldwide recognized OECD, to test our products against a detailed **"NO LIST"** (see right).

This list represents all harmful chemicals commonly used in skin care manufacturing, including natural allergenic food proteins.

We work ensure our botanical formulas do not contain any of these chemical ingredients, hormone disruptors or additional contaminants such as molds, yeasts, or heavy metals which can be also be harmful to sensitive children.

Our certified seal is proof that our products are verified and certified that no unwanted harsh chemical ingredient or hormone disruptor is in our product.

RUBY-BLUE BUNNY'S BOTANICAL INGREDIENTS PROTECT BABY WITH 5 LEVELS SKIN CARE

Ruby-Blue Bunny children's skin care products is not only made clean, but is crafted to nourish, soothe and protect your baby's delicate skin and body.

We use more botanical ingredients than any other skin care product. Up to 18 ingredients have been specially selected for their proven rich levels of vitamins, minerals, and antioxidants that have the ability to soothe, cleanse, heal and protect your baby's delicate skin.

Rich in up to 18 organic, active botanical ingredients to achieve 5 levels of skin care

- ✔ **CLEANS** - with botanical surfactants (bubbles)
- ✔ **NOURISHES** - minerals and vitamins A, C, E, K
- ✔ **MOISTURIZES** - essential fatty acids (Omega 3)
- ✔ **SOOTHES** - anti-inflammatory polysaccharides

TWO UNIQUE NATURAL INGREDIENTS WE LOVE

Active Certified Aloe

Many skin care products use water as a base - it is first ingredient listed on the label. Water weakens and dilutes the other ingredients. Ruby-Blue Bunny uses a proprietary Aloe. It is our first ingredient because it has so many wonderful healing and soothing benefits and works synergistic with the other botanical ingredients. Our proprietary aloe is special because it is up to 3-times more effective than other commercially available aloe vera and exceeds the standards established by the International Aloe Science Council's (IASC) Certification Program for content and purity.

Our aloe is from the inner leaf 'gel fillet' that is abundant in vitamins, enzymes, minerals, sugars, (polysaccharides), fatty acids, and amino acids. Never use a skin care product made with whole leaf aloe. Whole leaf aloe contains high amounts of a latex called aloin. Aloin is a known laxative and skin irritant.

Active Manuka Honey 12+

According to a 2013 review in the *Journal of Cosmetic Dermatology*, Manuka Honey is well documented to support a number of skin therapy applications. We only use active New Zealand Manuka Honey with a UMF (Unique Manuka Factor) number higher than 12+. This assures that both peroxide and non-peroxide antibacterial properties are present, as well as anti-fungal and anti-viral properties necessary to promote therapeutic benefits.

We use Manuka Honey in **Ruby-Blue Bunny's Manuka Honey Advance Skin Cream**. This wonderful cream is blended with additional skin nourishing organic botanicals to help enrich, soothe and support skin that is very irritated and needs special attention.

Ruby-Blue Bunny™

GARDEN FRESH™ with Carrot and Pumpkin

SHAMPOO & BODY WASH

This gentle pH neutral shampoo is a complex blend of 18 certified organic ingredients that to work together to provide all levels of delicate skin care. Light botanical suds help cleanse skin while nourishing vitamins and minerals, essential fatty acids, and antioxidants helps nourish, moisturize and protect baby's skin health.

Aloe barbadensis Leaf Juice (from Aloe Fillet Gel)*, Decyl Glucoside (non-GMO Coconut & Palm Oils), Xanthan Gum (non-GMO, vegetable-derived), Citric Acid (non-GMO, fruit-derived), Potassium Sorbate (non-GMO, mineral-salt), Grapefruit Seed Extract (Citrus grandis), Ethylhexylglycerin, Ascorbic Acid (Vitamin C) (non-GMO, vegetable-derived), Glycerin (non-GMO, vegetable-derived), Jojoba Seed Oil* (Simmondsia chinensis), Sunflower Seed Oil* (Helianthus annuus), Balsam Peru Oil* (Myroxylon pereiare), Pumpkin Seed Oil* (Curbita pepo), Carrot Seed Oil* (Daucus carota sativa), Clary Extract* (Salvia sclarea), Basil Leaf Extract* (Ocimum basilicum), Bergamot Fruit Oil* (Citrus aurantium bergamia), Cardamomum Seed Oil* (Elettaria Cardamom), Pelargonium graveolens (Geranium) Flower Oil*, Ginger Root Oil* (Zingiber officinale), Lemon Peel Oil* (Citrus medica limonum), Lime Oil* (Citrus aurantifolia), Orange Peel Oil* (Citrus unarium dulcis), Clary Oil* (Salvia sclarea), Ylang Ylang Flower Oil* (Cananga odorata) *ORGANIC INGREDIENT

ALL-BODY LOTION { anytime moisturizer }

This light lotion is a complex blend of 18 certified organic ingredients that to work together to replenish skin moisture while providing nourishing vitamins and minerals, and essential fatty acids. Our lotion can be used any time to prevent dry skin and is especially important to use after bathing to rehydrate lost moisture and restore healthy skin oils.

Aloe barbadensis Leaf Juice (from Inner Fillet Gel)*, Sunflower (Helianthus annuus) Seed Oil*, Jojoba Seed Oil* (Simmondsia chinensis), Stearic Acid (vegetable-derived fatty acid) USP Ethylhexylglycerin, Cetyl Alcohol (Coconut Fatty Alcohol), Glycerin* (vegetable-derived)*, Sodium Hydroxide (mineral-salt), Grapefruit Seed Extract (Citrus grandis), Ascorbic Acid (Vitamin C) vegetable-derived), Glycerin (vegetable-derived), Potassium Sorbate Powder (mineral-salt), Hydroxyethylcellulose (vegetable derived), Xanthan Gum (non-GMO, vegetable-derived), Ylang Ylang Flower Oil* (Cananga odorata), Olive Fruit Oil (virgin, cold pressed)*, (Olea Europaea) Balsam Peru Oil* (Myroxylon pereiare), Rosemary Extract* (Rosmarinus officinalis), Bergamot Fruit Oil* (Citrus aurantium bergamia), Mandarin Orange Peel Oil* (Citrus nobilis), Grapefruit Peel Oil* (Citrus grandis), Cardamomum Seed Oil* (Elettaria Cardamom), Clary Oil* (Salvia sclarea), Pelargonium graveolens (Geranium) Flower Oil*, Ginger Root Oil* (Zingiber officinale), Lime Oil* (Citrus aurantifolia), Lemon Peel Oil* (Citrus medica limonum), Peppermint Oil* (Mentha Piperita), Orange Peel Oil* (Citrus unarium dulcis)

BABY MASSAGE OIL { relax & soothe for sleep time }

Calming Baby Massage Oil helps to relax the body and promote calmness - the perfect blend to use at nap or bedtime. Made with 20 high quality botanical oils including Sunflower, Pumpkin and Carrot that are not only exceptionally pure, but contain additional antioxidant rich botanical nutrients for baby's skin. Remember - Please do not use in bath water because the tub and baby may become slippery and could fall.

Sunflower Seed Oil* (Helianthus annuus), Jojoba Seed Oil* (Simmondsia chinensis), Grapeseed Oil* (Vitis vinifera), Olive Fruit Oil (virgin, cold pressed)* (Olea Europaea), Pumpkin Seed Oil* (Cucurbita pepo), Carrot Seed Oil* (Daucus carota sativa), Balsam Peru Oil* (Myroxylon pereirae), Rosemary Extract* (Rosmarinus officinalis), Bergamot Fruit Oil* (Citrus aurantium bergamia), Mandarin Orange Peel Oil* (Citrus nobilis), Cardamom Seed Oil* (Elettaria Cardamom), Clary Oil* (Salvia sclarea), Pelargonium graveolens (Geranium) Flower Oil*, Ginger Root Oil* (Zingiber officinale), Lime Oil* (Citrus aurantifolia), Lemon Peel Oil* (Citrus medica limonum), Peppermint Oil* (Mentha Piperita), Ylang Ylang Flower Oil* (Cananga odorata), Orange Peel Oil* (Citrus aurantium dulcis), *ORGANIC INGREDIENT

MANUKA HONEY ADVANCED SKIN CREAM { for very irritated skin }

We combine Active New Zealand Manuka Honey 12+, with high performance aloe and 10 additional botanical ingredients that to work synergistic to support four levels of healing properties; nourishing vitamins and minerals, moisturizing through essential fatty acids (omega's 3, 6 & 9), skin protestant antioxidants, and skin soothing anti-inflammatory bioflavonoids.

It is for these reasons why RBB's Manuka Honey Advance Skin Cream can address a wide variety of skin issues such as eczema, diaper rash, after the sun, skin moisturizer, chapped nipples from breast feeding, antiseptic for small wounds and scrapes as well as for reducing scarring.

Elaeis Guineensis (Palm) Fruit Oil*, Cera Flava Beeswax*, Cocos Nucifera (Coconut) Oil*, Sodium Hydroxide (mineral-salt), Theobroma Cacao (Cocoa) Seed Butter Aloe barbadensis Leaf Juice (from Inner Fillet Gel)*, Sunflower Seed Oil* (Helianthus annuus), Jojoba Seed Oil* (Simmondsia chinensis), Potassium Sorbate (plant derived-salts), New Zealand Manuka Honey 12+*, Olive Fruit Oil* -virgin, cold pressed (Olea Europaea), Ethylhexylglycerin, Pumpkin Seed Oil* (Cucurbita pepo), Grapefruit Seed Extract* (Citrus grandis), Balsam Peru Oil* (Myroxylon pereirae), Daucus Carota Sativa (Carrot) Seed Oil, Ascorbic Acid-Vitamin C (non-GMO, vegetable-derived), Glycerin (non-GMO, vegetable-derived)

Ruby-Blue Bunny™

SPRING GARDEN™ with Chamomile & Calendula

SHAMPOO & BODY WASH

This gentle pH neutral soft scent shampoo is a complex blend of 21 certified organic ingredients that to work together to provide all levels of delicate skin care. Light botanical suds help cleanse skin while nourishing vitamins and minerals, essential fatty acids, and antioxidants helps nourish, moisturize and protect baby's skin health.

HOW TO GIVE YOUR BABY BATH

1

Gather all your bath supplies (including Ruby-Blue Bunny Shampoo & Body Wash, a soft wash cloth, and a small cup), baby bath tub, a towel to dry baby, a clean diaper, and clothes. Make sure the room is cozy and warm so your baby doesn't get cold.

2

Fill the tub without baby in the tub with about 3-4 inches of water that feels warm, but not hot. Always test the water using the inside of your wrist. If the water burns your wrist, it is too hot for baby. The water should be about 90 degrees Fahrenheit (32 degrees Celsius) or just a few degrees warmer.

3

When the water temperature is safe, gently slip your baby into the tub feet first, using one hand to support her neck and head. Keep your baby secure. Wet babies are slippery and especially hard to hold. To prevent baby from slipping, place your baby along one of your arms. Make sure the baby's head, neck, and back are supported. TIP: place a towel at the bottom of the tub - it will help baby from sliding on the slippery tub while you hold him/her.

**BABY SAFE WATER
TEMPERATURE
90° F / 32° C**

Remember! It is important to never leave baby alone in the bathtub.

3

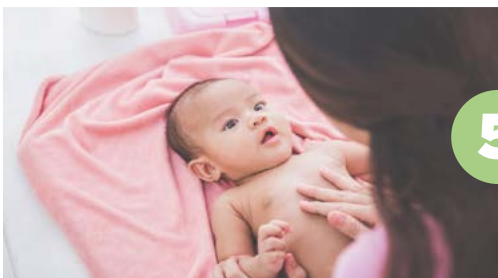

Use just a small amount of Ruby-Blue Bunny Shampoo & Body Wash. Wash baby with your hand or a washcloth from top to bottom, front and back. Start by washing her scalp with a wet, soapy cloth. Rinse the soap from the cloth and use it to gently clean baby's eyes and face. Wash baby's genitals, gently starting at the front then move to the back.

4

Rinse your baby thoroughly with cupfuls of water, and wipe her with a clean washcloth. Carefully lift baby out of the tub with one hand supporting her neck and head and the other hand supporting her bottom. (Careful! babies are slippery when wet.) Wrap your baby in a towel and pat dry.

Remember! **Baby's are slippery when wet**

5

Nourish your baby's clean skin with Ruby-Blue Bunny All-Body Lotion. Put a small amount of lotion in the palm of your hand. Gently rub all over baby's chest, legs, arms and back. For rough or dry patches on baby's scalp, and to prevent diaper rash, use Ruby-Blue Bunny Manuka Advance Skin Care.

If baby is still restless after bathtime, give baby a relaxing massage with Ruby-Blue Bunny Massage Oil. Start by placing a small amount of oil in the palm of your hand and gently massage back and legs. Turn over baby carefully - oil will make baby slippery. Continue to rub toes, legs, chest and arms. Swaddle baby in towel and give loving kisses.
